

## CONTENTS

### NUMERICAL METHODS I – BASIS AND FUNDAMENTALS

<b>1. NUMERAL SYSTEMS .....</b>	<b>11</b>
<b>1.1 Decimal system .....</b>	21
<b>1.2 Binary system .....</b>	22
1.2.1 Conversions from the binary to the decimal system .....	23
1.2.2 Conversions from the decimal to the binary system .....	24
<b>1.3 Octal system .....</b>	26
<b>1.4 Hexadecimal system .....</b>	27
<b>2. NUMBERS IN DIGITAL COMPUTERS .....</b>	<b>29</b>
<b>2.1 Binary coded decimal (BCD) .....</b>	30
<b>2.2 Densely packed decimal (DPD) .....</b>	31
<b>2.3 Negative integers .....</b>	31
2.3.1 Second complement .....	31
2.3.2 Biased integers .....	33
<b>2.4 Formats of numbers in digital computers .....</b>	34
<b>2.5 Binary integer formats .....</b>	36
2.5.1 Binary integer in byte .....	37
2.5.2 Short integer (16 bits) .....	39
2.5.3 Integer (32 bits) .....	39
2.5.4 Long integer (64 bits) .....	40
2.5.5 Double long integer (128 bits) .....	40
<b>2.6 Decimal integer formats .....</b>	41
<b>2.7 Introduction to floating-point formats .....</b>	42
2.7.1 Types of floating-point formats .....	43

---

2.7.2 Binary significand .....	44
2.7.3 Decimal significand .....	45
<b>2.8 Binary floating-point formats .....</b>	<b>47</b>
2.8.1 Binary16 (Half-precision binary format) .....	51
2.8.2 Binary32 (Single-precision binary format) .....	55
2.8.3 Binary64 (Double-precision binary format) .....	58
2.8.4 Binary80 (Extended double-precision binary format) .....	60
2.8.5 Binary128 (Quadruple-precision binary format) .....	63
<b>2.9 Decimal floating-point formats .....</b>	<b>65</b>
2.9.1 Decimal32 (Single-precision decimal format) .....	71
2.9.2 Decimal64 (Double-precision decimal format) .....	76
2.9.3 Decimal128 (Quadruple-precision decimal format) .....	80
<b>3. VARIABLES AND NUMERICAL ERRORS .....</b>	<b>85</b>
<b>    3.1 Common terminology .....</b>	<b>86</b>
3.1.1 Errors and uncertainty .....	86
3.1.2 Precision vs accuracy .....	88
3.1.3 Significant digits vs accuracy .....	89
<b>    3.2 Numerical errors .....</b>	<b>90</b>
3.2.1 Rounding errors .....	91
3.2.2 Representation error .....	92
<b>    3.3 Propagation of numerical error .....</b>	<b>97</b>
3.3.1 Propagated error of a single variable .....	104
3.3.2 Propagated error of multiple variables .....	107
<b>    3.4 Propagated error vs representation error .....</b>	<b>113</b>
<b>    3.5 Numerical instability .....</b>	<b>115</b>
<b>    3.6 Method error .....</b>	<b>118</b>
<b>    3.7 Approximation error .....</b>	<b>119</b>
<b>4. RANDOM VARIABLES AND PROCESSES .....</b>	<b>121</b>
<b>    4.1 Random processes .....</b>	<b>122</b>
4.1.1 Definition of random variables .....	123
4.1.2 Quantification of random processes .....	125
4.1.3 Equivalent non-random process .....	127
4.1.4 Probability distribution .....	129
4.1.5 Probability density .....	130
4.1.6 Probability function .....	131
4.1.7 Sampling .....	132
<b>    4.2 Parameters and statistics .....</b>	<b>135</b>
4.2.1 Expected value .....	135
4.2.2 Arithmetical average and mean .....	137
4.2.3 Population covariance .....	140

4.2.4 Sample covariance .....	141
4.2.5 Variance .....	142
4.2.6 Standard deviations .....	145
4.2.7 Correlation coefficient .....	146
4.2.8 Linear combinations of random variables .....	149
4.2.9 Nonlinear combinations of random variables .....	151
<b>5. RANDOM ERRORS AND UNCERTAINTY .....</b>	<b>153</b>
<b>5.1 Normal distribution .....</b>	<b>154</b>
<b>5.2 Error in the mean (repeated observations) .....</b>	<b>158</b>
<b>5.3 Uncertainty vs sample deviation .....</b>	<b>159</b>
<b>5.4 Propagation of uncertainty .....</b>	<b>163</b>
5.4.1 Function of a single variable .....	165
5.4.2 Propagated random error of multiple variables .....	166
<b>5.5 Randomisation of constant variables .....</b>	<b>170</b>
<b>6. REGRESSION .....</b>	<b>171</b>
<b>6.1 Linear regression .....</b>	<b>171</b>
6.1.1 Simple linear regression .....	172
6.1.2 Simple linear regression through fixed point .....	176
6.1.3 Simple linear regression in multiple variables .....	178
6.1.4 Orthogonal linear regression in two variables .....	179
6.1.5 Orthogonal linear regression in multiple variables .....	185
<b>6.2 Polynomial regression .....</b>	<b>187</b>
<b>6.3 Logarithmic regression .....</b>	<b>189</b>
<b>6.4 Exponential regression .....</b>	<b>193</b>
<b>6.5 Power regression .....</b>	<b>197</b>
<b>7. ROOTS OF UNIVARIATE POLYNOMIALS .....</b>	<b>201</b>
<b>7.1 Descartes' rule of signs .....</b>	<b>202</b>
<b>7.2 Roots of second degree polynomials .....</b>	<b>203</b>
7.2.1 Floating-point implementation .....	204
<b>7.3 Roots of third degree polynomials .....</b>	<b>206</b>
7.3.1 Polynomials with three real roots .....	209
7.3.2 Polynomials with two equal real roots .....	212
7.3.3 Polynomials with three equal real roots .....	213
7.3.4 Algorithm for finding three real roots .....	213
7.3.5 Polynomials with one real and a pair of complex roots .....	216
7.3.6 Algorithm for finding real and complex roots .....	220
<b>7.4 Roots of forth degree polynomials .....</b>	<b>222</b>
7.4.1 Real roots .....	226
7.4.2 Complex-conjugated roots .....	228

---

<b>7.5 Newton's method .....</b>	<b>233</b>
<b>7.6 Weierstrass method .....</b>	<b>235</b>
<b>APPENDIX .....</b>	<b>239</b>
A.1 Events .....	239
A.2 Probability .....	243
A.3 Typical probability distributions .....	246
A.4 Sum of binomially distributed random variables .....	249
<b>INDEXES .....</b>	<b>251</b>
INDEX OF ALGORITHMS .....	251
INDEX OF EXAMPLES .....	252
INDEX .....	255
REFERENCES .....	256

## SOME MATHEMATICAL SYMBOLS

$\forall$	<i>for all</i>
$\exists$	<i>exist(s)</i>
$\setminus$	<i>except, excluding</i>
$ $	<i>with property,</i>
$\wedge$	<i>and</i> (binary logical operator)
$\vee$	<i>or</i> (binary logical operator)
$\{\}$	<i>set of elements</i>
$\in$	<i>is element of a set</i>
$\notin$	<i>is not element of a set</i>
$\subset$	<i>subset of a set</i>
$\subseteq$	<i>subset or equal to a set,</i>
$\cup$	<i>union of two (or more) sets</i>
$\cap$	<i>common elements of two (or more) sets</i>
$\Sigma$	<i>sum</i>

### Events

$\bar{A}$	complementary event of the event A
$\oplus$	sum of events (creates compound event)
$\otimes$	product of events (creates sub-event contained in both events)
$\times$	product of subsequent events (product of the second kind)
$\setminus$	difference of events (excludes sub-events)
$\subseteq$	inclusion of events
$A   B$	event A occurs given that B has occurred
