

INDEX OF ALGORITHMS

	Page
2.1 Coefficients α_r for the orthogonal polynomial approximation with the arbitrary weighting function $w(x)$ on the continuous interval $[a, b]$	51
2.2 Coefficients α_r for the orthogonal polynomial approximation on the continuous interval $[a, b]$ by using recursion formula	57
2.3 Coefficients α_r in the Legendre polynomial approximation	63
2.4 Coefficients α_r in the approximation with shifted Legendre polynomials	67
2.5 Coefficients α_r in the Jacobi polynomial approximation	73
2.6 Coefficients α_r for the orthogonal polynomial approximation with the arbitrary set of weighting coefficients w^k on the discrete domain	94
2.7 Coefficients α_r in discrete polynomial approximation	96
2.8 Coefficients α_r in Gram polynomial approximation	100
2.9 Conversion of power series	104
3.1 Fourier approximation	108
3.2 Fourier half-range sine approximation	113
3.3 Fourier half-range cosine approximation	115
3.4 Coefficients in discrete Fourier approximation of type 1	123
3.5 Coefficients b_n in discrete half-range Fourier sine approximation of type 1	125
3.6 Coefficients a_n in discrete half-range Fourier cosine approximation of type 1	127
3.7 Coefficients a_n, b_n in discrete Fourier approximation of type 2	132
3.8 Discrete half-range Fourier sine approximation of type 2	134
3.9 Discrete half-range Fourier cosine approximation of type 2	136
4.1 Coefficients α_r in Chebyshev polynomial approximation on continuous domain $[-1, 1]$	151

4.2	Coefficients α_r in discrete Chebyshev approximation – type 1	157
4.3	Coefficients α_r in discrete Chebyshev approximation – type 2	159
4.4	Coefficients α_r in approximation with shifted Chebyshev polynomials on continuous domain $[0,1]$	166
4.5	Coefficients α_r in discrete approximation of type 1 with shifted Chebyshev polynomials	168
4.6	Coefficients α_r in discrete approximation of type 2 with shifted Chebyshev polynomial	170
4.7	Coefficients α_r in approximation with generalised Chebyshev polynomials on continuous domain $[a,b]$	177
4.8	Coefficients α_r in discrete approximation of type 1 with generalised Chebyshev polynomials	179
4.9	Coefficients α_r in discrete approximation of type 2 with generalised Chebyshev polynomials	181
4.10	Coefficients α_r in Chebyshev polynomial approximation of second kind on continuous domain $[-1,1]$	187
4.11	Coefficients α_r in approximation with Chebyshev rational functions $R_n(\hat{x})$ on semi-infinite continuous domain $[0, \infty)$	196
4.12	Coefficients α_r in discrete approximation of type 1 with Chebyshev rational functions	198
4.13	Coefficients α_r in discrete approximation with Chebyshev rational functions of type 2	200
5.1	Chebyshev economisation with polynomials $T_n(x)$	216
5.2	Chebyshev economisation with shifted polynomials $T_n^*(x)$	221
A.1	Calculating a set of binomial coefficients	226
A.2	Generating coefficients of Pascal triangle	228
E.1	Gauss error function	245
E.2	Gauss error function with extended argument range	248

INDEX OF EXAMPLES

	Page
Usage of some mathematical symbols	12
1.1 Taylor series expansion of the function $\ln(x)$ in the point $\xi = 1$	19
1.2 Double Taylor series expansion	21
1.3 Few examples of Maclaurin series expansion	22
1.4 Maclaurin series expansion of $f(x_1, x_2) = e^{x_1+x_2}$	23
1.5 Padé approximant	26
Errors in Padé approximation	28
1.6 Ill-conditioned matrix in the least-squares approximation	41
2.1 First few Legendre polynomials	59
2.2 First few shifted Legendre polynomials	64
2.3 First few Jacobi polynomials	69
2.4 First few ultraspherical, Legendre and Chebyshev polynomials	71
2.5 First few Laguerre polynomials	75
2.6 First few generalised Laguerre polynomials	76
2.7 First few physicists' Hermite polynomials	78
2.8 First few probabilists' Hermite polynomials are	79
2.9 First few nonzero radial polynomials	85
2.10 First few nonzero Zernike polynomials	86
2.11 First few Gram polynomials	98
3.1 Fourier expansion of function $h(\varphi) = 1, 0 < \varphi < \pi$	113
3.2 Fourier expansion of function $h(\varphi) = \varphi(\pi - \varphi), 0 < \varphi < \pi$	115
4.1 First few Chebyshev polynomials	145
4.2 First few shifted Chebyshev polynomials	160
4.3 First few Chebyshev polynomials of second kind	184
4.4 First few Chebyshev rational functions	190

5.1	Uniform approximation of a monomial by using the definition of Chebyshev polynomials	204
5.2	Uniform approximation of a monomial by using the definition of shifted Chebyshev polynomials	206
5.3	Successive reduction of power series	209
5.4	Chebyshev expansion of the first few monomials	213
5.5	Chebyshev economisation	214
5.6	Expansions of the first few monomials	217
5.7	Economisation of a polynomial approximation of the function $\cosh x$ on the interval $[0,1]$	218
5.8	Economisation of polynomial approximation of function $\cos(\pi x/2)$ on the interval $[0,1]$	219
A.1	First few factorial powers	224
A.2	Factorial with integer power	224
A.3	Characteristic binomial coefficients	224
A.4	Binomial coefficients for real number	229
A.5	Binomial formula for third power of an algebraic sum	230
A.6	Second derivative of a product	231
B.1	Gamma function	233

INDEX

A

- Approximation, 13
 - Chebyshev, 141
 - continuous, 149, 164, 175
 - discrete, 154, 167, 169, 178, 180
 - discrete domain, 27
 - errors, 27
 - Fourier, 105
 - discrete approximation, 119
 - half-range approximation, 111
 - Gram, 99
 - least-squares, 37
 - polynomial, 43
 - near the point, 18
 - rational functions, 193, 197, 199
 - uniform approximation, 203

B

- Binomial coefficients, 224, 229
- Binomial formulas, 229
- Beta function, 234

C

- convergence
 - orthogonal series, 36
 - Fourier series, 109
- Chebyshev, 161
 - discrete approximation, 154, 167, 178, 197
 - economisation, 213
 - polynomials, 141
 - generalised, 172
 - shifted, 160, 217, 220
 - the first kind, 144
 - the second kind, 182
 - rational functions, 189

- series, 141
 - expansion, 141
 - multiple series, 201
 - shifted polynomials, 160
- Conversion of power series, 101

D

- Dirichlet conditions, 109

E

- Economisation, 213, 220
 - shifted Chebyshev polynomials, 217, 220
- Error function → Gauss error function

F

- Factorials, 223
- Factorial powers, 223
- Fourier, 105
 - coefficients, 33
 - rational functions, 194
 - Chebyshev expansion, 150, 186
 - discrete approximation, 119, 128
 - half-range, 124, 133
 - expansion, 105
 - generalised coefficients, 33
 - half-range series 111
 - sine series, 112
 - cosine series, 114
 - series, 109
 - multiple, 118

G

- Gauss error function, 241
 - expansion, 242, 245
 - economised formula, 249

Gamma function, 232
 Generalised Fourier coefficients, 33
 Gibbs phenomena, 109
 Gram polynomials, 97

H

Half-range Fourier series, 124, 133
 Hermite polynomials, 77

J

Jacobi polynomials 69

L

Laguerre polynomials, 75
 - generalised, 76
 Least-squares approximation, 37
 - on a continuous domain. 38
 - on a discrete domain, 39
 - polynomial approximation, 43
 - with orthogonal functions, 42
 Legendre, 58
 - associated polynomials, 60
 - polynomials, 60
 - shifted polynomials, 64

M

Maclaurin series expansion, 22
 Multiple derivatives of products, 230
 Multiple power series, 81

O

orthogonal
 - functions, 30
 - on continuous domain, 30
 - on discrete domain, 32
 - polynomials \rightarrow polynomials
 - series expansion, 30, 33

P

Padé approximant, 24
 Pascal triangle, 227

polynomials

- Chebyshev, 141
- shifted, 160, 217, 220
- Gram polynomials, 97
- approximation, 109
- Hermite polynomials, 77
- Jacobi polynomials, 69
- Laguerre polynomials, 75
- generalised, 76
- Legendre polynomials, 58
- associated, 60
- shifted, 64
- Zernike polynomials, 84

S

series

- Maclaurin series, 22
 - orthogonal series, 30
 - Taylor series, 18
- Standard series, 237
- exponential series, 22, 238
 - hyperbolic series, 239
 - inverse hyperbolic series, 23, 240
 - inverse trigonometric series, 238
 - logarithmic series, 19, 239
 - power series, 237
 - trigonometric series, 22, 237

successive reduction, 209

T

Taylor series expansion, 18

U

Uniform approximation, 203
 - exact, 211

Z

Zernike polynomials, 84
